

## Project Team

**Client:** The Co-operative Group in partnership with Manchester City Council with support from The European Regional Development Fund.

**Lighting Designer:** Cundall Light4

**Scope of Works:** Principal Contractor - Detail design, supply, installation and programming of the interactive LED feature lighting.

**Introduction** Following a European wide tender process Studiotech were tasked with turning the Cundall Light4 designs and NOMA aspirations into a dynamic light installation.

**Solution** We took the concept devised by the client and created a bespoke interactive lighting solution. Our engineers installed a total of 9,480 individually addressable LED lights to each Earth Tube totalling a staggering 28,440 LED lights.

**Result** With the concept continually evolving, we have been able to future proof the lighting so it can deliver new elements, as the capabilities of the Earth Tubes develop over the coming years.

Testimonials *" I would like to congratulate the Studiotech team for the successful delivery of the NOMA Earth Tubes lighting project in Manchester which forms part of the Public Realm Phase 2 & 3 Contract.*

*Studiotech engineered the project from concept to completion in a professional and organised manner. As Principal Contractor Studiotech managed all aspects of a safe installation on a challenging site with the minimum of disruption to the Client and their stakeholders."*

*-John Luddington - Project Manager - The Co-operative*

*"Studiotech took our designs and brought them to life in an exciting and eye-catching display of colour and style. Throughout the whole design and installation process their engineers worked with professionalism and diligence to complete on time and produce the stunning results that can now be seen in Angel Square. We are very much looking forward to working with Studiotech in the very near future."*

*-Andrew Bissell - Director -Cundall Light4*
