

Project Team

Client: KPS Group
 Architect: Leonard Design
 Lighting Designer: TÜV SÜD
 Scope of Works: Detail design, supply, installation, control, programming.

Introduction In a bid to enhance the environment for customers and retailers, Fort Kinnaird Retail Park was recently modernised with a refurbishment of the existing retail units.

Client brief Designed by architectural practice, Leonard Design, the retail park included a range of lighting concepts for the outdated frontages. Lighting was used in different styles to increase the appeal of façades.

Studiotech were approached to assist with the transformation of various units throughout Fort Kinnaird Retail Park. With a diverse range of lighting styles devised by lighting designers TÜV SÜD, Studiotech's expertise was a key factor in being able to successfully deliver the units to such a high and consistent standard.

Solution Lighting and application styles included:

- Recessed linear façade lighting.
- RGBW backlit store frontage which can be pre programmed for key calendar dates, such as Christmas and Valentine's Day.
- Trough Lighting.
- 'Goal Post' style lighting to the entrance of the unit.
