**ST ENOCH  
SHOPPING CENTRE**

**CLIENT** Sovereign Centros

**DESIGNER** Cooper Cromar

**CONCEPT** Designed specifically to captivate the customers passing through the centre, the 4.8m bespoke pendants were developed by Studiotech, taking the concept right through to completion.

## SOLUTION

The design consisted of six 'nest' style lighting pendants, with colour changing capabilities, to captivate visitors as they venture through the Centre.

## PRODUCT

Studiotech took the project from detailed design right through to installation and programming, working closely with the design team to make sure we turned their aspirations into a reality. Overseen by Studiotech and in collaboration with our fabrication partners; Sutton Creative, the rigorous manufacturing process included developing a tailored way of manufacturing the nests in sections due to their sheer size and weight.

## EXPERIENCE

Designed specifically to captivate the customers passing through the centre, the 4.8m bespoke pendants certainly turn heads!
