DESIGNER

Planit IE

CONCEPT

Planit-IE's concept is sensitive to its surroundings yet celebrates the rich history of the site, providing a lush, green approach, taking inspiration from the site's unique proximity to the River Aire.

SOLUTION

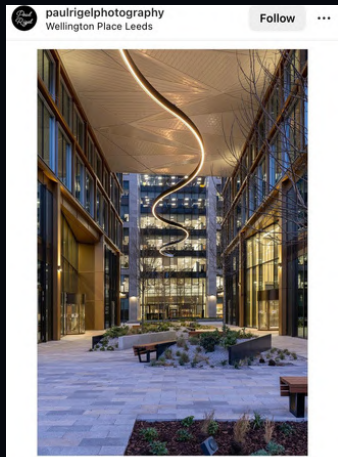

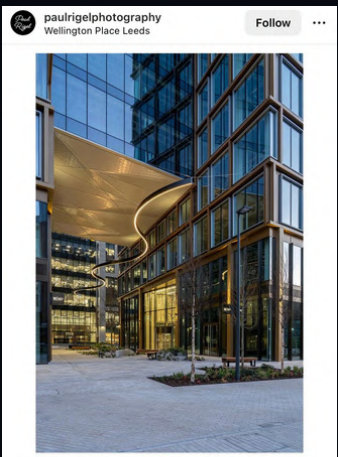

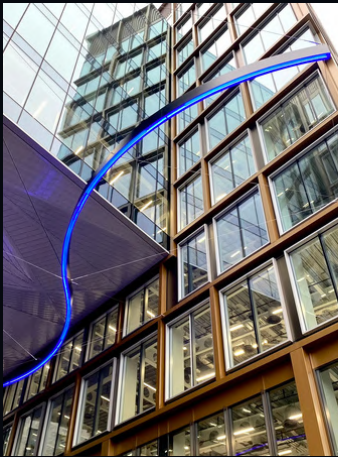

The sheer scale of this pendant required expert detailed design and engineering including the precise length and weight bearing calculations of the catenary cable to ensure a safe and efficient installation.

PRODUCT

From bespoke wall brackets designed to withstand the weight of the 43 metre long pendant to overseeing the fabrication of the custom LED channel, Studiotech was responsible for the full development of what is believed to be the first catenary pendant of this style.

EXPERIENCE

The bespoke pendant suspends above the walkway, creating an impactful transition between the buildings and public realm below. The detail and engineering behind the pendant makes this a true one-of-a-kind piece for a similarly unique destination.
